

Fire Evacuation Services

Profile

In accordance with legislation and Fire & Emergency New Zealand (FENZ) there is a requirement for most commercial facilities to have a FENZ approved Fire Evacuation Scheme in place and to conduct trial evacuation drills on a six monthly basis with regular reporting to FENZ.

CoveKinloch New Zealand Ltd has an experienced team dedicated to Fire Evacuation. Our FPNZ (Fire Protection Association of New Zealand) certified consultants are highly experienced in planning, designing and implementing professional Evacuation Schemes for all building types from single level through to complex and multi-storey centres.

All of our projects are tailored to each specific building. This ensures staff training is relevant for the building they occupy, helping you meet your obligations under the Health and Safety at Work Act 2015 and WorkSafe practices.
